4) Here's the cool part. But I am not a designer. Start by first rotating the image in the correct direction. If you have more tricks of your own, feel free to share in the comments for all us "designers" of the marketing world! Originally published Sep 9, 2013 4:38:00 PM, updated July 28 2017 This is as simple as File >> Open. You'll see the tool that contains the color you're looking for. 1) First things first, if you're looking to add brand colors to your color palette for image creation, you'll need to place a brand image in Photoshop to grab the colors from. In this case I took a screenshot of HubSpot.com. Modern marketers wear multiple hats, and a frequent hat that appears (often, the best looking hat of them all) is the designer's hat. I suggest clicking on the little double-sided arrow above it a few times. Use the Right Color Every Time How painful is it when you want to quickly craft an image for a blog post, or add a component to another image for an email, but you don't have the right colors that your brand uses memorized? While I can learn more about A how to use Photoshop here, this post will share some beginner tips to start designing for your marketing today. I've "designed" endless PowerPoint presentations. Hi. My name is Anum Hussain, and I am not a professional designer. Used this trick several times, most often with book images in which I superpose screenshots of a PDF to make a 3D-looking image, like this for our Pinterest introductory ebook: this is how you do it: 1) First, open the image you want to customize. This will give you the right brush you need. While you can go to paint crazy away in an old tool like painting ... to visualize more this concept, check out this short Instagram video. (Note: Your speakers are not broken, no sound): Easily construct straight lines, elegant or backgrounds Now let's say you want to stile a background or component of an image. Three Soft Supports to help you design some basic graphics in Photoshop. While you keep it pressed, use your mouse to click on that corner and start adjusting the image to fit the main image configuration you are personalizing. If you are free to change the color you want to use by following the same color instructions mentioned in the first trick. Whatever it is, I have done it. 3) When you click Edit >> Transform FREE, you can customize your image of a variety of ways. From there, you just have to play with what kind of brush and size you use since step two. That's why we have offered 75 royalty free recently for you to download and use. 3) To have a clean and lasting aspect, press and hold the MayA's key while using your mouse to click and draw your line. Now your image is personalized! To view more this concept, take a look at this brief Instagram Video. (Note: Your speakers are not broken, no sound): And there you have, friends. You will notice that the image begins to transform itself in any way that you take it out! 5) Make sure to adjust each corner (even if it is out of the to make sure the image dimensions look normal and clean). Holding down the Shift key will ensure that the drawn line is straight. You will notice that when you go to change the color, you can now view the color you chose before as an option in recent colors. One. One.
